

ARC

VAULTING POLES

DESIGN BY ROCH-BACH
 Exclusively for : RENTPOLES.COM

The ARC vaulting poles are built with a combined 50 years of manufacture and coaching experience to ensure the best flexural strength and recoil possible. Easy penetration and designed for vaulters and coaches who want to learn and teach proper position to allow best longterm results. Designed with a special inner wrap blue fiber glass to increase pole returning and an eye catching look. The ARC provides a smooth ride to allow a smooth transition for a vertical position on the pole.

- **EASY to BEND and un-recoils slower**
- **Exceptional balance and carry weight**
- **Durable smaller handle grip**

This ARC design offers a smaller handle for younger vaulters, for maximum confidence and pole control. These poles meet the NFHS weight capacity rule.

The ARC is the only pole design on the market for beginners to medium level vaulters.

ALL POLES SOLD WITH NO WARRANTY

Do not jump with any spiked, cracked, or damaged pole. Our digital flex test insures that each pole has been structurally flex tested as a final test of integrity. Each pole is engraved with a serial number and has a mark to determine the flex side toward the pit at plant. Never select a pole less than the vaulters weight. This is not a spot check! Broken vaulting poles will not be replaced and are sold without warranty. All risks are assumed by the user and a coach must be present at all time in training and in competition. Use only with regulation size vaulting systems. Protect your pole from spikes, falling to the ground or striking the standard.
