Why Rent

Pole Vaulting is a progressive event where athletes outgrow the poles they use. A typical athlete will progress through about four poles every season. Kids that improve rapidly will need even more poles.

To ensure continued improvement and maximum safety, athletes need access to a progressive line of poles. With new poles costing up to \$700.00, it simply is not cost-effective to regularly purchase new poles every time an athlete outgrows one.

Every year budget cuts force schools to tighten funds for track programs. Money to buy four or more poles every season is tough to come by.

Renting poles is the rational, cost effective way to keep athletes safe and keep athletes improving, and we at Fuzion Athletics are committed to offering an unmatched level of customer service to help every athlete improve reach their potential.
